

## Empowering Oncology Professionals with Real-World Evidence

WalletScan Onco is a groundbreaking tool that empowers oncologists to make data-driven decisions efficiently. By integrating advanced analytics and extensive Real-World Evidence (RWE), we facilitate personalized treatment pathways in everyday oncology practice.

### Fast Answers at the Point of Care

Access crucial information to make informed decisions in real-time.

### Personalized Solution

Tailor treatments based on robust data insights to meet individual patient needs.

### Anytime, Anywhere Access

Utilize our platform at the hospital or remotely for continual support.

## The Challenge

Despite established protocols, individualized therapeutic decisions remain difficult for healthcare professionals.

## Our Solution

With access to global registries and payer data, plus decision trees based on clinical guidelines, WalletScan Onco supports quick decision-making right beside the patient bed, enhancing patient care.

### The Power of RWD in Therapeutic Decisions

A study<sup>1</sup> showed that head and neck cancer patients receiving long-term Medical Nutrition Therapy ( $\geq 7$  months) had significantly longer overall survival, highlighting the value of nutritional interventions in treatment decisions.

<sup>1</sup> Pathol Oncol Res. 2024 Mar 15;30:1611664. doi: 10.3389/pore.2024.1611664

## Join Us for a Pilot Project

We are seeking **visionary partners** to pioneer the next phase of oncology care. Collaborate with us to enhance patient outcomes and healthcare efficiency.

**Observe, Analyze, Engage with data.**
